4 Summary

5 This is a proof of concept integration between a GitHub ([GitHub, 2008](#)) repo and figshare
6 ([figshare, 2016](#)) in an effort to get a DOI for a GitHub repository. When a repository is tagged
7 for release on GitHub, Fidgit ([Smith, 2013](#)) will import the release into figshare thus giving
8 the code bundle a DOI. In a somewhat meta fashion, Fidgit is publishing itself to figshare with
9 DOI '<https://doi.org/10.6084/m9.figshare.828487>' ([figshare Archive, n.d.](#)).

11 Statement of need

12 Something profound about how this is a very important area of research...
