

LumiWork

- Automatized DFT tasks with Δ SCF constrained occupation
- 2 Relaxations (ground and excited state)
 - + 4 static scf (optional)
 - + 4 nscf band structures (optional)
- Detection of errors, automatic restarts, ... handled by abipy

- Defect supercell structure (.cif, ...)
- DFT input parameters (cut-off, tol, ...)
- Constrained occupations (... 1 1 1 0 1 0 0 ...)

- Abinit output files (netcdf)
